Dipali Kharat

CAREER SUMMARY

- A year of experience developing and maintaining Android applications.
- Experience of analyzing, designing, and developing applications using Android studio environment.
- Experience of Firebase Backend Service for Realtime database, multiple authentication types and hosting.
- Experience in implementation of OOP.
- Knowledge of HTML5, CSS, Bootstrap, JavaScript, Node.js, Express.js, MongoDB.
- Experience of developing android applications using Kotlin and Java.
- Knowledge of designing and developing Web applications using Angular Framework.
- Knowledge of analyzing, designing, and developing web applications using Visual studio 2019.
- Knowledge of building UI (User Interface) using state of the art technologies including HTML5, XML.
- Knowledge of Figma Graphics Tool for UI designing.
- Knowledge of working with MS SQL server.
- Knowledge of application development lifecycles management and experience with process model Agile.
- Ability to learn and use recent technologies very quickly and excellent in communication and interpersonal skills.

TECHNICAL SKILLS

Languages:	Java, Kotlin, C#, C, JavaScript
Web Technologies:	CSS, HTML, XML, JavaScript, JSON, Angular, Bootstrap, Node.js, Express.js, EJS
Application Tools:	Android Studio, Visual Studio, Visual studio code, SQL Server, MS Office
Microsoft Technologies:	ASP.NET, MVC
Databases:	SQL Server, Firebase Realtime Database, MongoDB
Operating Systems:	Windows 7, 8, 10
Version Control:	GitHub

ACADEMIC QUALIFICATION

- Bachelor's of Engineering from SSGMCE COE Shegaon, Maharashtra (2020)

CERTIFICATIONS

- Complete Web Development 2022 BootCamp.
- Completed “Learn Figma: User Interface Design Essentials – UI/UX Design”

PROJECT SUMMARY

Project Name	AD Express Maintenance Support
Client Name	GEICO
Duration	April 2021 – March 2022
Role	Software Engineer Trainee
Technology Solution	Java, Kotlin , XML, Firebase.
Responsibilities	• Involved in implementation of user interfaces using XML. • Involved in developing applications which deliver app usage analytics • Involved in developing CameraX functionality in Kotlin • Involved in developing Barcode Scanning functionality

Project Name	Location Tracker System
Duration	July 2021 – Nov 2021
Role	Android Developer
Technology Solution	Kotlin , XML, Firebase, JetPack Components.
Responsibilities	• Involved in implementation of user interfaces using XML. • Involved in developing applications UI and Logic • Involved in using Google Services

Project Name	Tic-tac-toe-Gaming
Duration	Jan 2022 – March 2022
Role	Android Developer
Technology Solution	Kotlin , XML, Firebase, JetPack Components.
Responsibilities	• Involved in implementation of user interfaces using XML. • Involved in developing applications UI and Logic • Involved in unit testing • Deployed the application on Google Playstore • Visit app: https://play.google.com/store/apps/details?id=com.androdevdk.tictactoe_gaming

Project Name	Bright Horizon
Duration	March 2021 – April 2021
Role	Software Engineer Trainee
Technology Solution	JavaScript, Html5, Angular Framework, Json .
Responsibilities	• Involved in implementation of user interfaces. • Involved in developing applications UI and Logic • Involved in unit testing • Hosted the application with firebase • Visit app: https://mlprojects-9751e.web.app/home

Name	Complete Web development- HandsOn Projects
Duration	March 2022 – June 2022
Role	Software Engineer
Technology Solution	HTML5, CSS, JS, Node.js, Express.js, EJS, MongoDB
Project List	• Dice Challenge • DrumKit • Simon Game • Newsletter Signup • Todo list-EJS
